

THIRD PARTY INSPECTION OF MATERIALS AND WORKS

The Karnataka Urban Water Supply and Drainage Board is the nodal agency for Karnataka State for formulation and implementation of Drinking Water Supply and Under Ground Drainage works for all urban areas of the state except Bangalore City.

In order to ensure good quality in construction and transparency in the methodology of implementation, the Board is the first organization in the state to appoint reputed Third party inspection agencies for inspection of Materials (1999). The appointing of Third party inspection agencies is done through open tendering. The appointed Third party agency will be given a Quality Assurance Plan based on relevant BIS/ International Standards. The inspection of the materials is carried out rigorously against standard procedures. Only those materials which have passed the tests will be used in the work.

Third Party Inspection of Materials at Factory

The Board has taken a pro-active step to ensure total quality of Implementation. The Board has initiated Third Party Inspection of all works at site from 2010. This would ensure transparency in procedures and methodology adopted for construction and ultimately to better quality standards.
